

CUSHOTHANE® EZ™

The Cold or Wet Storage Specialist

- Ultra smooth ride and ultra fast flat spot run-out
- Highest traction compound provides grip even on slippery floors
- Very low rolling resistance helps conserve battery life
- Highest glass transition point significantly reduces chunking and loss of traction in extra low temperature facilities

CUSHOTHANE® EZ™

Applications

Engineered specifically to perform in cold and extreme-deep freeze warehouses. This softer compound also excels as a general use drive wheel for medium loads and speeds typically found on Walkie Pallet trucks operating in grocery stores, big box stores and small, clean warehouses.

The Finest Cold Storage/Freezer Solution

Smoothest ride and quickest run-out of any flat spot - for less vibration and reduced noise, minimizing machine and operator fatigue and increasing productivity

Superior traction in all conditions - unmatched performance in wet and cold conditions

Excellent energy savings - very low rolling resistance minimizes battery drainage in cold storage applications and provides longest operating time possible

Highest chunk resistance - especially at low temperature from a specialized polyurethane compound

Consistently Soft

- Cushothane® EZ™ holds its softness and flexibility beyond the normal cold storage/freezer temperature range.
- The competitor's harder compound and different chemistry quickly becomes harder and more brittle in normal cold storage/freezer temperatures, causing a harder ride, loss of traction and chunking.

Highest Chunk Resistance

- Cushothane® EZ™ is a high performance polyurethane which has a very high cut & tear resistance. Many competitors use a hard polyurethane with modified cure times to achieve a softer compound but sacrifice cut & tear properties.
- Moreover, the Cushothane® EZ™ was engineered to maintain high cut & tear resistance at low temperatures.

Customer Reviews

"When an end-user has an application where they want a soft ride, need traction, and have had problems with tires chunking off, I always endorse Superior Tire & Rubber Corp's Cushothane® EZ™ compound as the best tool for the job. I've even promoted it's ability to other dealers."

-Richard Ceccacci, VP - Ceccacci Lift Truck Service

"Recently, a competitor's tire was flat-spotting for us and offered very short and unsatisfactory work life. Superior Tire & Rubber Corp's Cushothane® EZ™ Smooth Crown tire, siped for traction, eliminated the flat-spotting, giving us truly the longest ride and greatest value."

-Bob Bartolomeo, Maintenance Supervisor - SYSCO Foods Services
