Sweeperthane™ Transition Sleeves

SWEEPERTHANE™ Transition Sleeves
-simple design, simple installation,
simplest way for cost savings

US Patent #7798177

Won't Restrict Air Flow - The slim design and smooth surface to the polyurethane sleeve provides better air flow and offers minimal drag in total air flow cross section

Change The Sleeve Not the Tube - Made with high strength and high rebound polyurethane which causes most debris to bounce off instead of directly impacting the steel tube system. This high cut and tear resistance system will provide a longer life benefit.

Greater Suction Performance - Polyurethane can maintain a smooth surface longer as debris leads to bounce off instead of having a direct impact which causes scratching resulting in a loss of suction as the metal tube wears and chunks off

Available to fit 10" and 12" Tubes - Sleeves can be attached together to add length for use in hooper tubes.

2,000 Hour Guarantee

How To Register Your Warranty Online:

Step 1: Go Online to: www.SuperiorTire.com

Step 2: From the main menu select:

- Road & Parking Maintenance
- Street Sweeper Wear Parts

Step 3: Click on the "SWEEPERTHANE" Transition Sleeve Warranty Form" link

Step 4: Fill out the entire form and click 'Send'

Easy Installation

Simply slide the sleeve into the existing steel transition tube so that the ring on top sits on top; as seen here.

Then, simply add a bead of silicon caulking to the bottom of the transition sleeve to limit water and debris from collecting behind the sleeve.

In case of hopper tube application, SWEEPERTHANE™ Transition Steeves are designed with a lock ability feature that allows individual tubes to be extended and cut to fit every tube length requirement

Also Available SWEEPERTHANE™ Drag Shoes

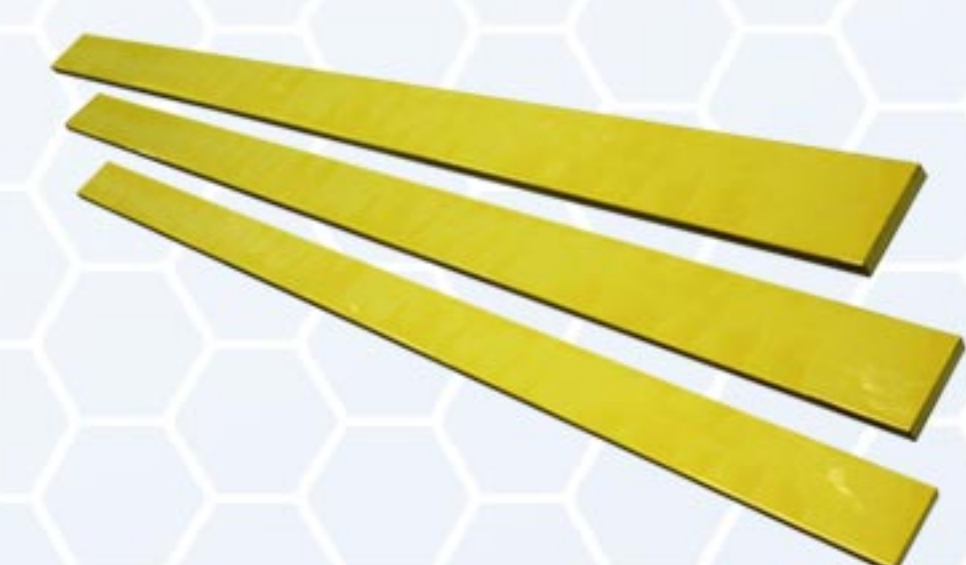

- Will flex instead of break
- OEM replacement for popular mechanical broom style sweepers
- Non-damaging to road surface while providing the highest abrasion resistance

SWEEPERTHANE™ Sprockets & Idlers

- Manufactured from high performance polyurethane or rubber
- Provides extra durability to mechanical elevator assemblies in creasing the life of street sweeper elevator chains.

SWEEPERTHANE™ Flight Squeegees

- Longer life-cycle & reduced down time
- Consistent rigidly for better cleaning.
- Immediate Availability
